

Can Your Best Salesperson Produce \$660K+ Profit in 90 Days? From “Dead” Leads?

The stats below are for a Debit Consolidation company.

Like any high volume, lead-reliant business, they spend **multiple 6 figures** on leads per month, but unfortunately...

...they only speak to **half the leads**.

The other half, well they're written off as... *"The cost of doing business."*

The leads come in from paid ads and organic traffic.

It then gets **passed into a dialer and is dialed every 4 hours, for 48 hours.**

That means they get dialed **16 times** in the first **48 hours**.

After 3 days, they decided to send 319 of those “**dialed to death**” leads to us.

After plugging those leads into our system, and turning on our **AI droid**, which wakes up dead leads using **AI, ChatGPT** and **SMS** here's what happened...

Out of those 319 leads...

47 responded...

21 booked appointments...

And the sales?

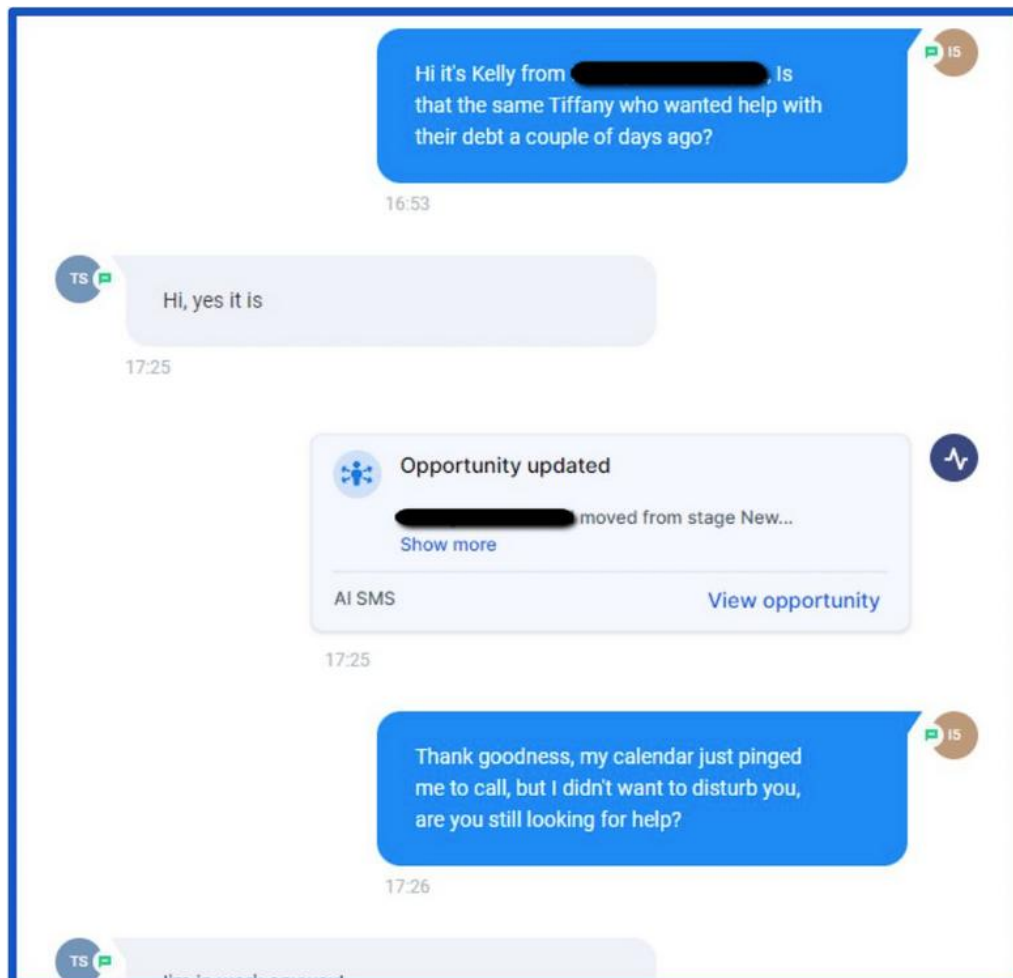

Well, each sales is worth between \$4,000 and \$7,000.

Over the course of the next 90 days our AI droid, created \$600K of new business

...from leads they had given up on!

“How does it work,” you ask?

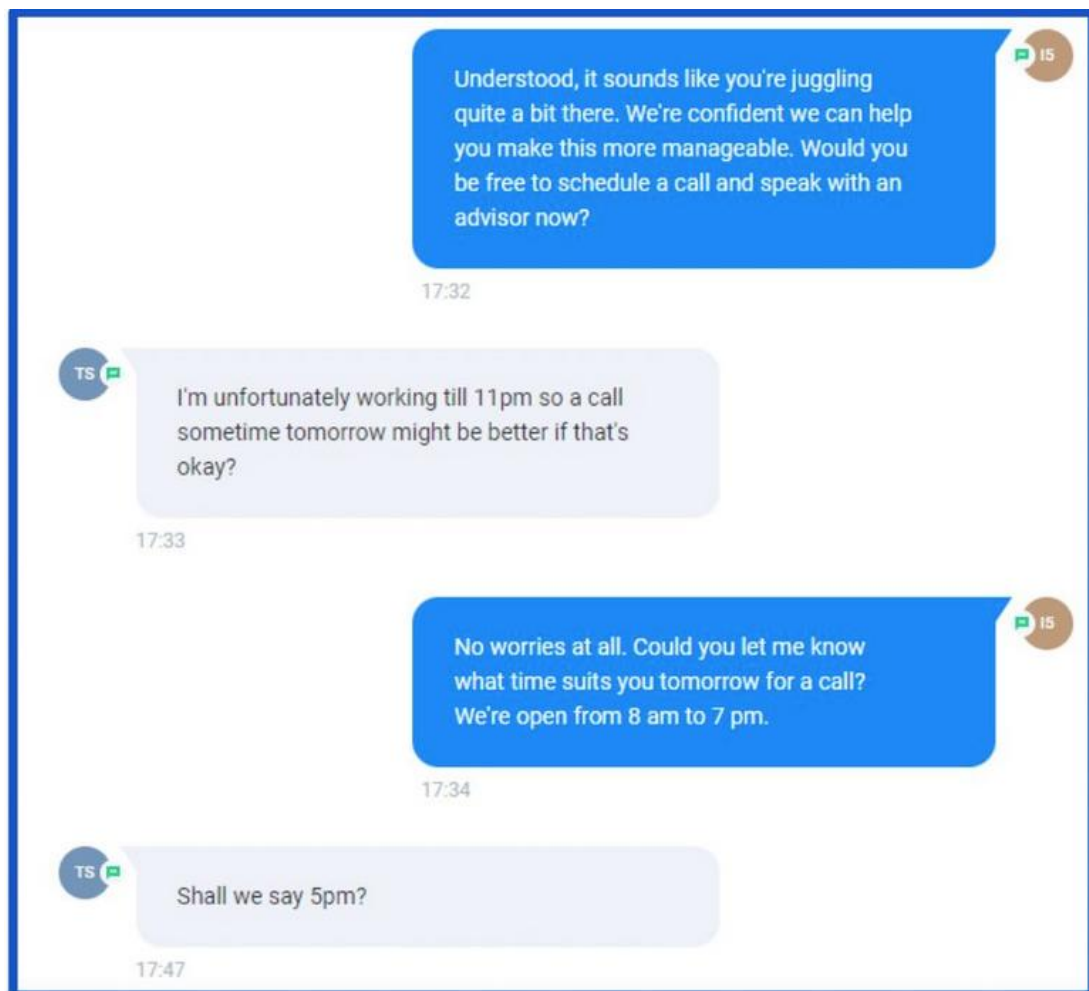

This is an actual conversation between our AI droid and a debt consolidation lead...

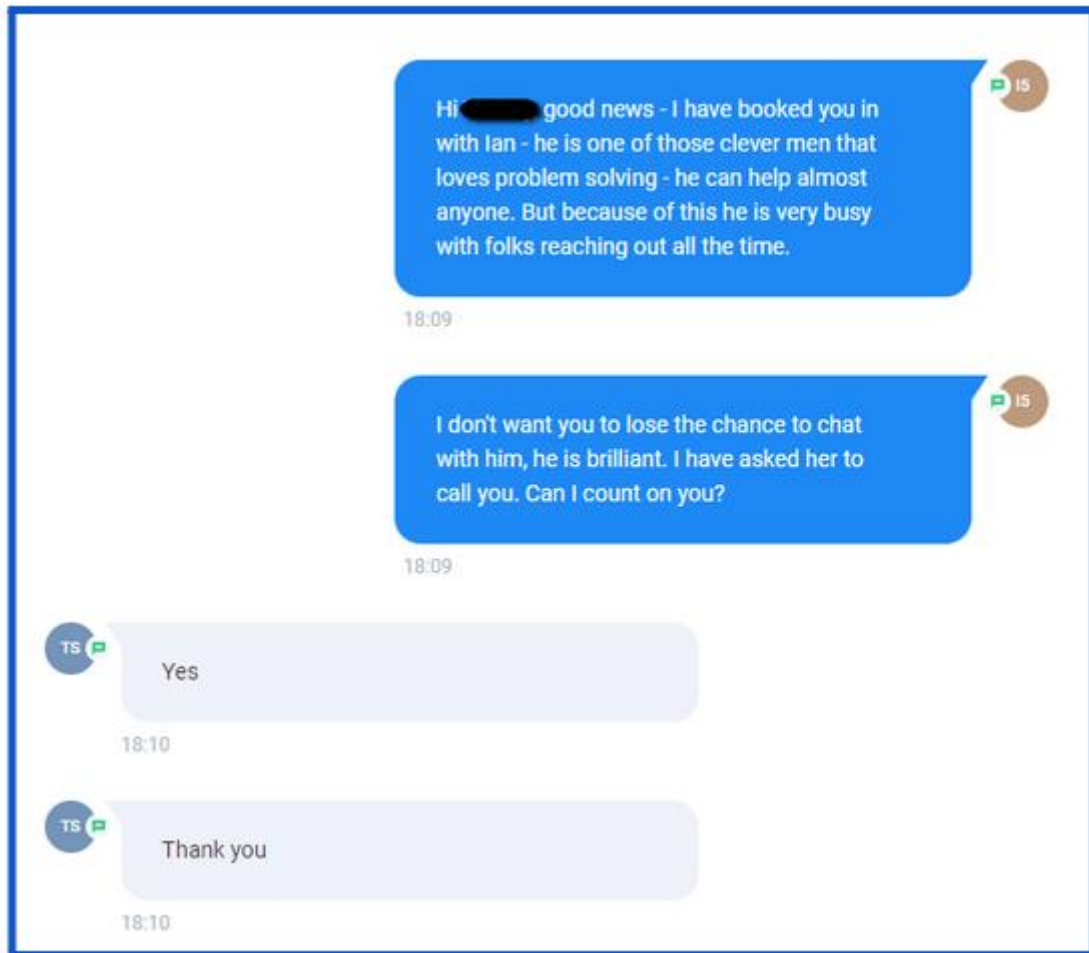

The AI droid starts each conversation in a super personal way to “**ring the bell**” in the prospect's mind. To get that “Ohhhh, yeah, now I remember,” response, which is why they text back.

The next message is a **humble disarm** that brings down their “I’m too busy” defenses and opens up the conversations over SMS

Eventually, the conversation turns to “I’m very busy,” and our AI pivots and asks the right questions to schedule the appointment...

The AI Droid knows that by tying the conversation back to an **ACTUAL real person**, the prospect will feel more accountable and committed when Ian actually calls.

And guess what...**SHOW rates are through the roof!**

And there you have it!

So far, we haven't found an industry our AI droid can't help.

Take this one...

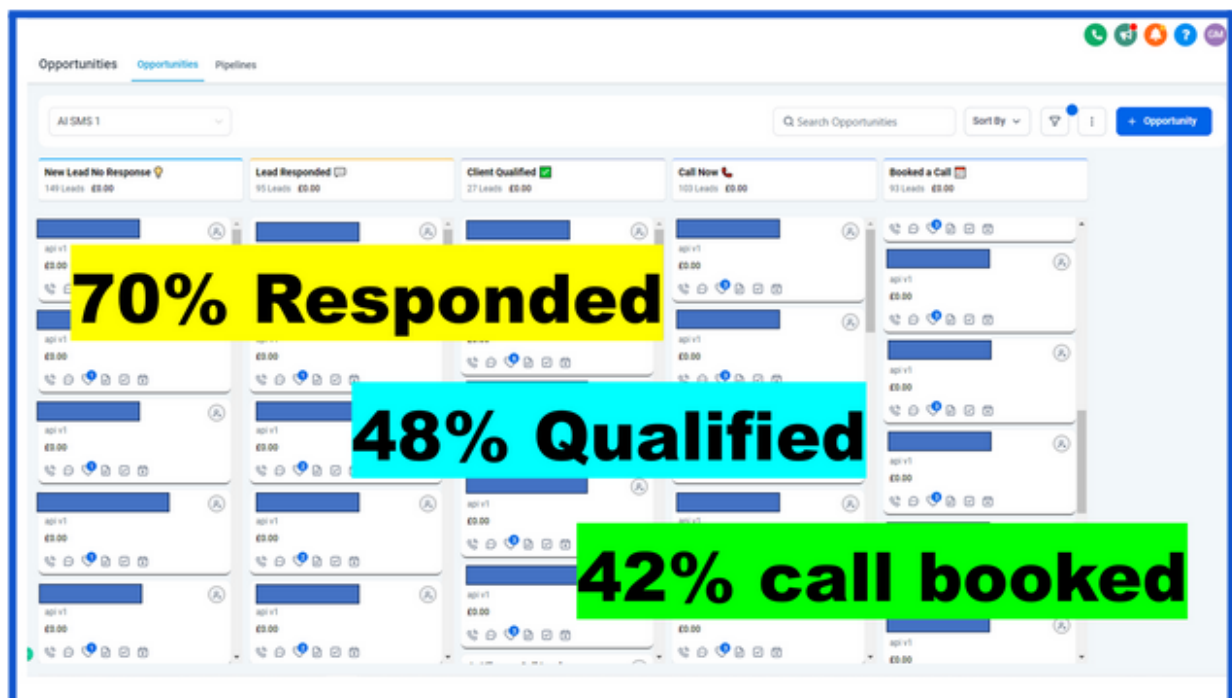

A law firm, in England, (yes we can do this pretty much anywhere) specializing in compensation claims.

The AI droid was given 467 leads.

103 of them asked for an instant call back, and another 93 of them booked appointments.

Even if only a quarter of those book appointments...

...that's still **49 additional sales!**

So let me ask you...

How much **money** do you have **sitting in your database** right now?

If you'd like to find out...

Reach out to me at Aaron@aisalesdroids.ai

Thanks,

Aaron
